Drive It... and let your own experience sell you

NO one who has sat behind the wheel of the New Chevrolet Six could ever be contented with less than the quality... less than the performance that this outstanding SIX provides.

For Chevrolet is the lowest priced six in the world with this remarkable combination of car features—

Body by Fisher, with deep, richly-upholstered cushions, Fisher VV windshield, Tenthred Fringing, fashionable Duo colorings, mainly beautiful designs. Six-cylinder valve-in-head engine, of high-compression non-detuning type, with the extra efficiency of "direct firing" and swifter pick-up due to automatic accelerating pump. New design, ball-bearing steering gear, giving marvellous handling ease. Efficient braking system of non-locking four-wheel brakes and independent emergency brakes. Long semi-elliptic shock-absorber springs, parallel with the frame. Modern Convenience Features, twin-beam headlights, (auto-controlled) high-speed window regulators, indirectly-lighted instrument panel, including electric temperature gauge and theft-proof Electrical.

And all these, plus the established economy and staunch endurance for which Chevrolet is famous, at the price of a four! Drive it and let your own experience sell you on Chevrolet Six! Circle 100

IT'S BETTER BECAUSE IT'S CANADIAN

E. G. Law, President of Fuego Oil Co. Arrived In Oyen This Morning

Preparations Are Being Made To Drill Again

Excitement ran high in Oyen last Friday when word was received that the Fuego had blown in with a tremendous flow of gas estimated at about 15,000,000 cubic feet.

Shortly after five o'clock in the morning the well blew in with a terrific roar, shooting gas, mud, water and small rock 300 feet into the air. The string of tools was successfully withdrawn and the well continued to belch forth gas with a roar that could be heard a mile away. About the middle of the afternoon the pressure eased off to some extent and the flow tapered off. Shortly after 3:30 p.m. a light spray of crude was in evidence and it was not long before the derrick and every thing in the vicinity was coated with a thick mess of it. On Saturday morning the well was capped and the flow directed into the snuff.

Officials of the company are extremely optimistic as to the outcome of their work. Feeling that the real body of oil has not yet been touched they have high hopes of bringing in a real well after some further drilling. The well is now reported to have about 2200 feet of water and oil in it, and preparations are being made to clear this out to resume drilling. A pipe line is being constructed to take off the gas which will be burned about 600 feet from the well.

Mr. E. G. Law, president of the company, arrived in Oyen this morning from Toronto, and after resting at the hotel, left for the well site.

Following word of the well blowing in, there has been a steady stream of visitors to Oyen and the well site. Among those who travelled hundreds of miles to see it were Mr. J. M. Moody, geologist, of Calgary, accompanied by his son, who arrived at the well on Sunday afternoon by aeroplane, the machine being piloted by Capt. McGill and by Capt. Macdonald, a mechanic, the Monday. Mr. Pears and Mr. Moore of Imperial Oil, were visitors at the well, besides numerous brokers. On Sunday it is estimated that well over two thousand people were at the site during the day.

Dial's Auction Sales

At the farm of Mr. Gus Schmitt, the east-half of Sec. 10, Twp. 27, Rge. 5, 6 miles south and 1 mile west of Esbey, Horse, cattle, farm machinery, household goods, feed etc. Thursday, September 20. Lunch served. Sale to commence at noon.

At the farm of Mr. Robert Lewison, Sec. 35, Twp. 25, Rge. 4, (right) by the Fuego Oil well, thirteen miles south of Oyen, Horse, cattle, machinery, feed etc. Tuesday, October 1. Lunch served. Sale to commence at 1 o'clock.

At the farm of Mr. Charles Nelson on the S.E. 1/4 27-29-4 (8 miles south of Oyen), horse farm machinery, household of feeds etc., on Thursday, October 3. Lunch served. Sale to commence at 12 noon.

Local Items

E. J. Anderson, B. Sc., Eye sight specialist, will be in Oyen on Saturday, September 28, at the hotel.

A bean supper and sale of home cooking will be held in the United Church on Saturday September 28, under the auspices of the Sunday school (proceeds for Christmas tree fund).

Sunday, September 29, is Rally Sunday. Parents are specially asked to be present at Sunday School.

Potatoes—You no doubt have to buy potatoes. We doubt if you will get them cheaper than from our stock of R.C.s, due to arrive in Oyen next week—S. A. Miller.

Mrs. H. C. Swartzlander, Sr., who has been visiting at the home of Mr. and Mrs. Charles Nelson, left last Monday for Calgary.

Mr. and Mrs. R. E. Gillespie left last Sunday by motor to spend a few days in Calgary. They are expected home tomorrow.

Mr. Louis Goldsmann, one of the engineers at the Fuego well left this morning for Fort Francis, Ont., having received word by wire last night, that his son was dangerously ill.

Born—To Mr. and Mrs. C. Gilchriston, of Exed, on Thursday, September 12, a son.

LEGAL NOTICE

'Fresh from the gardens'

Removal Of Friction and Strife

The setting up of the organization of the League of Nations had, as its main object, the removal of those racial, religious, economic and political animosities and suspicions which kept the nations of the world, and particularly the nations of Europe, in constant turmoil and on the verge of war. Because of the bitterness and suspicions thus kept alive and active, all nations armed to the teeth, one against another, while a multitude of restrictions and prohibitions of international intercourse were established. Not only were national boundaries marked by lines of fortifications, but intricate systems of espionage were maintained, passports were required of people passing across boundary lines, different gauges were built by railways, customs posts established everywhere, and hostile tariffs imposed by one country upon the products of other countries.

Thus were the people of each country kept warned against the possible enmity of other countries, suspicions were never allowed to die down, a constant state of friction prevailed, and strife was uppermost in every mind.

It was as inevitable as the rising of the sun that such a state of mind among the peoples of the world must end in some gigantic conflict. It came in 1914, and all but ruined mankind, and nearly destroyed civilization. The statesmen of the world realized that unless something was done to remove those suspicions and causes of friction, it would be only a matter of time until another and still more terrible war would take place.

When it became operative, the League of Nations further realized that, if disarmament was to be brought about, armies and navies reduced, and the huge drain on mankind for warlike purposes ended, the real causes of war must be removed, suspicion and animosity and misunderstanding developed among all people. In other words, that a proper spirit of international goodwill must replace the existing narrow and blatant national rampant everywhere.

The League, therefore, set up the International Labor Office, with the object of improving the lot of workers in all countries, and to raise the standard of living of the masses of the people everywhere, realizing that, if people are contented and happy, and are not struggling for existence, they will not be suspicious or jealous of others, nor quite so ready to plunge into war to better their own condition.

In like manner, the League has devoted its attention to many causes of sorrow and unrest in the world, and is presently seeking improvement in all departments of the world's work and methods of living.

It is because of many really great achievements in these directions, coupled with the horrors of the last war, that the minds of all people are today more open to receive and support plans for disarmament, and that, with the passing of the years, the prospects for permanent world peace become brighter.

World statesmen are now convinced that the greatest danger to the world peace is to be found in the realm of economics, in the rivalries of nations in the field of trade and commerce. This is the age of big business, the age of mechanized mass production, and of enormous surplus products of one nation in the markets of other nations. While this has been more or less true of all ages, and wars have been waged in order to seize territory with a view to later commercial exploitation or development, today the urge to secure new and larger markets is the strongest ally of those who clamor for large armies and huge navies.

Premier Briand's proposal for a United States of Europe is economic, rather than political. We venture to say it is not aimed at Great Britain, or the United States of America, but is designed to remove the multitude of restrictions which prevail all over Europe, isolating one nation from another, and doing economic hurt to all of them.

So, too, the Franco-British proposal for a two-year tariff holiday during which all nations would agree not to raise their tariffs, and meanwhile participate in a sincere international conference to determine ways and means whereby, without sacrificing the interests of any one country, a larger measure of freedom in trade and commerce, and intercourse generally, could be devised.

The world is coming to realize and fully understand that trade barriers are now the most prolific cause of misunderstanding between nations, and the cause of more friction and heart-burning than anything else. Even Canada and the United States, which live side by side in such mutual understanding and goodwill, are more frequently disturbed over tariffs than any other one thing, or all other things put together.

The ideal condition of world free trade may be an impossible dream for some generations to come, but surely much of the present friction can be removed, and the world begun to trace the path that leads to the ultimately desired goal.

Accelerated Schedules Feature C.P.R. Fall, Winter Time Table

New Schedules To Be In Effect Sunday, September 29th

The fall and winter time table of the Canadian Pacific Railway which will go into effect over the system on the last Sunday of September, features many important changes in passenger train service, among

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound through the change of life. It helps me and I cannot praise it too highly. I was troubled with head flashes and my limbs were heavy. I could hardly walk to do my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought to give it a trial. The first bottle me relief and I have told others what it does for me. I am willing for you to use my letter if you choose. Mrs. D. H. PETERS, Wilton, Ontario.

Ask Your Neighbor

which is the speeding up of transcontinental trains, saving the coast traveler a matter of ten hours. These improved schedules are in line with the Company's policy of keeping abreast of the times and providing the best possible service to its patrons. The Company's ticket agents are now in possession of complete information, which is available to the public upon application.

Sheep Ranching Expanding

Industry Is Showing Promising Development In British Columbia

The sheep industry from a ranching point of view shows signs of development in Western Canada, particularly in British Columbia, states the Department of Agriculture. Last year upwards of 10,000 head of ewes were bought in Alberta and shipped to the interior points of British Columbia. In 1928, the demand for range ewes exceeded the supply and the demand promises to be equally as good this year.

A Real Necessity

"Don't Get Excited" Club Would Be a Boon To World
There are clubs and societies for every conceivable purpose under the sun, yet one of the most obvious needs of Americans today is left entirely uncovered. What we need is a don't get excited club whose object shall be to keep people from coming to the boiling point when it isn't necessary.

The trouble with most of us is we get too excited over little things and not excited enough over the big ones. Agitation, loss of temper and surrender of self-command over the trivial annoyances of life are a sheer waste of time and energy. In most human affairs more can be accomplished through force and placidity than through force and violence and self-misconduct.

If a don't get excited club could be so organized as to conserve all the human volition that now goes to waste through needless excitement it could mean a great deal to the world, and it has reached the suburbs of a new era.

RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Not only does it cause the start pains of rheumatism, but it is not the cause. The cause is in the blood. Hot applications or rubbing with liniments may ease the pain, but it does not reach the cause. The pain is soon back again. To get rid of this trouble, the trouble must be treated through the blood and for this purpose nothing else can equal Dr. Williams' Pink Pills, which from first to last actually enrich the blood, thus removing the rheumatic poisons from the system. Mr. Henry E. Amiro, Lower Merion, Pa., N.S., tells what these pills did for him. He says: "I had an attack of acute rheumatism that I could not walk a hundred yards without so much suffering that I could not get out of bed. I took the last of the last week, and my movement caused me to feel much better. The care of a doctor but did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three dozen boxes when I was entirely relieved of all my trouble. I had walked four miles in my work, chop wood all day, and then walk home again. To anyone suffering from rheumatism, I can strongly recommend Dr. Williams' Pink Pills."

You can get these pills through any druggist, or by mail, enclosing a check or a box from Dr. Williams' Medicine Co., Brockville, Ont.

Greatest Wheat Exporters

Canada Stands At Top Of The List

As Exporter of Wheat
Canada stood first as an exporter of wheat during the 1927-28 crop year, with exports of 259,062,278 bushels. The United States came second with exports of 168,307,000; Argentina, third, with 155,258,000; and Australia fourth, with 109,060,000 bushels. The report of the Bureau of Statistics also shows that for 1927-28 the world's wheat production was 4,815,400,000 bushels, of which Canada produced 479,060,000 bushels ranking third with Russia in the first place and the United States in the second.

Mystery Of Steel Hardening

Steel Now Produced That Is Harder and More Ductile Than Damascus

Mystery and secrecy that for centuries shad romance over the art of steel hardening in America, has at last been completely disappeared, according to W. H. Egan, secretary of the American Society for Steel Treating.

The famous blades of Damascus, tempered, as legends, by being run through the body of a slave, hold no secrets for modern manufacturers. Steel is produced now that is harder than Damascus and possibly more ductile.

Dr. W. S. Carnes, a metallurgist, of Canton, Ohio, has produced a sword with which he can shave, and yet so ductile that he can wind it several times around his arm. It is of carbon vanadium steel. As recently as 10 years ago, some of the processes of hardening steel were carried on in gloomy and secluded basements. The officiating smith even wore a high silk hat, muffled shoulders and made passes over the treating tank.

Potatoes played an important role in a spud was set about on the water. Where the potato came to rest was the best place to plunge the "mille-bout" steel. During the war, a great stir was made when a group of steel treaters in Poughkeepsie, N.Y., could not obtain water from England. England, they thought this had given Sheffield steel its quality which steel treaters the world over had tried to imitate.

Today the process of steel hardening has become automatic with colored lights flashing the instant steel assumes the proper hardness.

A Corrector Of Pulmonary Troubles—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory process, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find it will win inflammation in the bronchial tubes.

Had Been There
"Travelled" said a sailor in a train to a passenger who had questioned him. "I should think I have. I've been all round the world; over an' under it, too. There ain't many ports I don't know the inside of."

Why, you must know a lot about geography."

Yes, we did put in there once, much of a place, what I remember it."

Increase In Water Power

The mid-year review of water power progress issued by Hon. Charles Stewart, Minister of the Interior, shows almost 200,000 h.p. added to the Dominion's total within the half year.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Will Establish Selterium

The government of Manitoba has decided to devote the \$250,000 voted at the last legislature, to establishing a sanatorium for tubercular children in Winnipeg.

Stop Colds with Minard's Liniment.

Hindu surgeons in early times used more than 100 different surgical instruments and performed difficult operations.

A penalty for failing to vote in elections is exacted in Czechoslovakia.

During Stunt Flyers

"Four Musketeers Of the Air" Dey Death At Camp Borden

"Four Musketeers of the Air" is the title accorded a small group of Canadian aviators who are rapidly demonstrating to the world that while Canada's air force may not be the largest, it is very nearly, if not the best, at its own particular game.

The Musketeers are Squadron Leader C. McEwen, M.C., Flight Lieut. David A. Harding, famous rugby player, Pilot Officer E. McEwen, and Pilot Officer E. A. McGowan, all four being stationed at Camp Borden, and flying the Canadian army's Stinson pursuit planes.

At various exhibitions both here and in the United States, the Musketeers have thrilled thousands with their antics. At Cleveland, Ohio, recently, they stole the thunder from many more famous fliers who had performed there, and their performance were regarded as one of the most remarkable ever seen in the United States.

Camp Borden features individual stunting at the finishing part of a novice flyer's education. It is a means of obtaining perfect control of an aeroplane, and while formation flying is also taught and practiced, the individual practice of putting an aeroplane through its paces is more strongly endorsed. One of the Musketeers' favorite stunts is a very spectacular one. The planes, starting in formation at around 3,000 feet, suddenly nose down. At terrific speed, with motors wide open, they spread out, fan-shaped, and suddenly zoom up. At the peak of the climb, with the motors nearly stopped, the "planes" gradually fall over backwards and fly for some distance upside-down.

Postal Revenue

Now On A Level With What It Was Three Years Ago When Letter Rate Was 3 Cents

Postal revenue is now on a level with what it was three years ago, despite the return to the 2 cent letter rate (in Canada, the United States and Mexico) in 1926, and that within the Empire on Christmas day, 1928. For the fiscal year ended March 31, 1928, the revenue was \$21,025,000, and for the fiscal year ended March 31, \$21,170,000.

A census is to be taken in more than 200 countries and colonies next year.

NO PLEBISCITE FOR ONTARIO SAYS FERGUSON

Toronto.—Launching the first campaign of his political campaign, Premier G. Howard Ferguson announced before a monster gathering that there would be no plebiscite under his administration on the Ontario liquor control act.

"There will be no plebiscites so long as the Conservative party is in power," Premier Ferguson exclaimed, "and I happen to be the head of the government. We may expect prepared always to submit our record to the public to have it critiqued and discussed, and we must be prepared to accept our responsibility."

He went on: "The government does not say the legislation is perfect. Time and experience are going to demonstrate its weakness." The Ontario liquor control act was added to be probably the best in the Dominion. It was administered by a very capable board.

"Let us try and improve any defects in the act as we go along so that any evils which may exist may be eliminated," Premier Ferguson declared.

"If I am opposed in principle to plebiscites," the premier stated. "They are contrary to the principle of responsible government. A plebiscite is a refuge behind which a government may hide from responsibility."

Premier Ferguson had caustic references for W. E. N. Sinclair, Liberal leader, on the liquor question. "I see," the Ontario premier declared, "Mr. Sinclair is a bit unstable in his effort to follow the path of prohibition. I am not quite sure where he is or where he will land in that respect. It is a pity that his position has been taken is that the people have approved of the legislation but Mr. Sinclair does not want the Ferguson Government to administer it. He now says the Ferguson Government should not administer it and to let those administer it who did not believe in it."

Wireless Service Soon

London, Eng.—Beam wireless service direct from England to Australia will be available to the public in the course of a few weeks. A new service on which the British Empire has been engaged for many months and experimental tests have reached the final stage. Individual messages already have been successfully transmitted in a prolonged series of trials.

Employment On Increase

Ottawa.—Employment in Canada at the beginning of August showed a further marked increase, according to statements tabulated by the Dominion Bureau of Statistics from 6,849 firms whose payrolls aggregated 1,074,612 persons as compared with 1,070,817 persons in July. The record is unusually good for this time of the year and the index number ran at 127.8 in a record for all time.

Income Tax Collections

Ottawa.—Income tax collections are mounting. In the five months ending August 31, collections totalled \$60,392,142, an increase of \$9,311,918 over the same period in 1928. In August alone, according to the National Revenue Department's figures, collections were \$850,427, against \$822,100 in August of last year.

Will Represent Japan

Tokyo.—Japan's first step in the new movement for naval disarmament was announced recently, when the navy ministry ordered Commander Tamejiro Yamaguchi, of the naval command staff, to proceed to Washington, to join the Japanese embassy staff there, preparatory to the proposed conference for naval limitation.

Earthquake Recorded

Saskatoon, Sask.—The seismograph at the University of Saskatchewan, here, recorded a severe earthquake shock Sept. 17th. It was the most severe registered here in many months. The location of the earthquake could not be determined, but compared with records from other points.

Army and Navy Veterans

Quebec.—The annual convention of the Army and Navy Veterans Association opened in Quebec with more than one hundred delegates from various parts of Canada in attendance. Brig-Gen. Hon. W. A. Griest, of Edmonton, Alta., presided.

For Compulsory Pool.

Aaron Saper in Favor of Marketing System Without License

Estevan, Sask.—"I am for co-operative marketing without reservation and without limitation, but above all I am for control of the commodity that the farmers raise by the farmers who raise it, and I am for the absolute elimination of even part of that control by those who have a financial interest in breaking down your great pools. I am for co-operation as a means to an end, for your own wheat by the farmers who own it, and being the absolute control of it in whatever technical method they think is the best method of control."

Before 700 farmers of the districts tributary to the town of Estevan, Aaron Saper, America's most famous co-operative farming advocate, gave expression to these sentiments when, under the auspices of the local lodge of the Saskatchewan section of the United Farmers of Canada, he opened the first gun in the campaign now being started in favor of a settlement of one hundred per cent. pool by legislation.

Without equivocation of any kind, Mr. Saper announced himself as being wholly in favor of one hundred per cent. pool by way of legislation, and in the course of an hour's address gave reasons why such legislation should be sought, why the farmers of the province should market all their grain through a single control, and why those who are now outside the pool should be compelled by way of legislation to place their products through the single marketing organization.

Four questions were outlined by Mr. Saper as the heads of his address: first, do the farmers generally understand what is meant by the term "one hundred per cent. pool," and secondly, if they do, do they know why it is necessary to have it, and thirdly, what objections are raised to legislation greater than those against it.

H.B. Line Now Ready

But Regular Trains Will Not Start In Operation Until Next Spring

The Pas, Man.—The Hudson Bay Railway is now in shape to allow regular trains to be run to Churchill with safety, it was learned here today. The final two miles of ballasting of the "first line" were completed this week, placing the road in condition for regular traffic.

However, passenger trains will not be run to the Bay until the spring, according to a recent decision in Ottawa. Railway quarters there reported published in the local press that the muskrat train had completed its first run to Churchill. The train completed its run at Mile 412 as usual. When the train left here recently it included the private cars of Major J. G. MacLachlan, district engineer, and J. B. Caspary, general superintendent of construction, western region. However, the business cars were taken from Mile 412 to the Bay on a train. The two officials made an inspection of the Flin Flon and reported everything in order.

Imperial Trade Conference

Movement Under Way To Formulate An Empire Trade Policy

London, Eng.—It is understood that attempts are being made to organize an Imperial commercial conference to be held prior to the meeting of premiers of the British Empire at the Imperial Conference in 1930.

It is proposed that each Dominion shall appoint a small delegation representative of the various interests, agriculture as well as business. The delegation will meet in London three months before the premiers and endeavor to hammer out an Empire trade policy which if agreed upon will be submitted to the premiers as a guide in their deliberations.

Canada Will Sign

Ottawa.—Canada will certainly sign the optional clause in the statutes of the world court of international justice. Premier Mackenzie King says. Mr. King was asked in regard to discussions which are going on at present in Geneva with respect to the signing of the clause by members of the British Empire.

Leads Opera In Germany

Berlin.—Albert Coster, noted conductor of the Berlin Grand Opera, as the first Englishman to yield the baton at the Berlin Opera since Sullivan conducted the opera a year ago. Mr. Coster was warmly received by the German audience.

Police Return Young Donkshobors To Home

Children Made Escape From Institution At Vancouver

Vancouver.—Eight Donkshobors, seven girls and a boy, ranging in age from eight to 16 years, escaped from the children's aid home here, and set out to join their parents at Oakville, Ont. In response to an alarm from the mother of the institution police located the youngsters and returned them to the home.

The children were brought here at the same time that more than 100 members of the Sons of Freedom, a sect of Donkshobors, were brought to here to serve six months sentences for taking part in a nude parade at South Sloane, B.C.

Entertained By Royalty

Premier MacDonald and Daughter, Isabel Guests At Sandringham Castle

Sandringham, Eng.—King George and Ramsay MacDonald sat together in the drawing-room of Sandringham Castle tonight and talked about whatever it is that a monarch and premier discuss when the latter is at the eve of a historic journey to the United States.

The Prince of Wales looked in for a short time before leaving the castle. The premier and his daughter Isabel were house guests tonight of their Majesties and will probably motor back to London tomorrow.

Mr. MacDonald also had a long interview with the King this afternoon while Miss Isabel was talking with Queen Mary.

THOMAS PLEASED WITH HIS RECENT VISIT TO CANADA

Liverpool, Eng.—"I am completely satisfied with the results of my visit," declared Right Hon. J. H. Thomas, Lord Privy Seal and Minister of Employment, on his return from a visit to Canada. "I hope and I feel that it will contribute towards a solution of the unemployment problem of this country this winter."

"I promise to meet representatives of all business interests which can do business with Canada, so the necessary steps can be taken to give practical effect to my efforts. Canada will take coal and steel from Great Britain which she at present takes from other areas."

"I have not asked Canada to take from us things she produces herself, but I did ask something on account of Britain being the largest layers of wheat from the Dominion," Mr. Thomas went on. "Canada," he declared, "admitted the force of what he put forward."

"Although, as I say, I shall meet the business organizations of the country, I say once again, as I did when I took office—there can be no inflexible unemployment remedy produced artificially. What we want for that are customers, and these I have done my best to secure," Mr. Thomas added.

Young Aristocrats Sail

Standing on each side of Captain J. N. Griffiths, skipper of Canadian Pacific steamer "Monticore," the Hon. John and the Hon. George Rodney, aged 9 and 10 respectively, had just made the 2,000-mile trip from their father's ranch at Fort Saskatchewan, Alberta, unaccompanied, across Canada under the care of Canadian Pacific Railway officials. They are on their way to school in England. The elder is eventually destined for Eton, and the younger for Rugby. Their father is the descendant of the famous British Admiral who won the great sea fight at Cape St. Vincent in 1780.

PROMINENT FINANCIER

Sir Robert Borthwick, prominent financier, of London, England, who is making a tour of the Dominion with Alfred Shephard, another British financier, with a view to looking over the various industrial and financial institutions here.

Sir Robert Borthwick, prominent financier, of London, England, who is making a tour of the Dominion with Alfred Shephard, another British financier, with a view to looking over the various industrial and financial institutions here.

Guiding Planes By Remote Radio Control

Aero Club Gives Glimpse Into Future Of Air Transportation

Philadelphia.—Aeroplane speed of 416 miles an hour and 'planes navigated without a pilot aboard through the medium of remote control by radio were glimpses into the future given to members of the Aero Club of Pennsylvania, and the Rotary Club, by speakers at a joint meeting here. It was G. E. Toews, chief engineer of the Aeronautical Laboratory at the navy yard, who in a technical address discussed possibilities. A speed of 140 miles an hour is the maximum which can be delivered by any known present day machine, he said, "although British have an engine up his sleeve" larger than any yet constructed.

Edward P. Howard, chief of the air regulations division of the United States Department of Commerce, disclosed that an application has been made for the licensing of a pilotless machine to be navigated by radio impulses.

Marler Presents Credentials

New Canadian Minister To Japan Received By Emperor

Tokyo.—Hon. H. M. Marler, new Canadian minister to Japan, presented his credentials to the Emperor Hirohito. Mr. Marler rode in his automobile of the Imperial household from his hotel to the palace. The ceremony was brief. The foreign minister and minister of the house hold were present. Japanese Minister Tokugawa also was given farewell audiences by the Emperor, prior to his sailing for Canada on the "Empress of France."

Prince Purchases Plane

London, Eng.—The Prince of Wales has bought a two-seated De Havilland Gipsy Moth aeroplane, paying \$3,500 for it. It is for his private use, and is equipped with dual control so he can take control himself during flights.

British Premier May Call Power Conference

Report Says Invitations Likely To Be Issued Shortly

Washington.—Invitations to the five-power naval conference are expected to be held late in January will be issued by Premier Ramsay MacDonald in near future, but the exact time remains to be determined.

This was learned here authoritatively recently, and with it came the further information that there would be no joint invitations on behalf of Great Britain and the United States as has been suggested in some quarters. Secretary of State Henry L. Stimson, said published despatches emanating from London, that Premier Ramsay MacDonald already had sent invitations to participate in the British embassies at Tokio, Paris and Rome, were without authority, and not entirely accurate.

The invitations from the British government will go to the United States, Japan, France, and Italy, with all five expected to participate in the conference which it is now proposed should be held in the British Isles.

Considerable preparatory work must be done before the invitations can be forwarded through the British embassies. It may be that the invitations will be deferred until after Premier MacDonald has held his conference with President Hoover in Washington, early in October, on points still in controversy between the United States and Great Britain on the cruise question.

Making Trip To West

Premier King To Make Short Visit In October

Ottawa.—Premier Mackenzie King proposes to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west.

Detailed arrangements for the trip have been somewhat held up owing to lack of information as to just when Premier Ramsay MacDonald will be coming to Ottawa. It has now been settled that Mr. MacDonald will be the capital shortly after the fifteenth of October, and Mr. King's trip will begin after the departure of the British prime minister.

Damage To Chinese Property Enormous

Government Estimates Cost Of Russian Raid At \$25,000,000

Shanghai.—The Chinese Nationalist Government estimated damage to Chinese property from Russian raid of Manchurian border points of \$25,000,000, according to a Kuomintang official agency despatch.

For the last month the Russo-Chinese border between Manchuria and Siberia has been the scene of sporadic fighting, the trouble being caused by Chinese seizure of the Chinese Eastern Railway administration from the authority of the U.S.S.R.

FOR CONTROL AND LIMITATION OF THE DRUG EVIL

Geneva.—The British delegation at the League of Nations assembly has presented a proposal designed to bring out an international agreement for control and limitation of production of heroin, morphine and cocaine. The move was regarded as representing a complete reversal by the Labor Government of the late Baldwin Government's attitude in refusing to enter an agreement seeking to limit manufacture of narcotics.

The new British position was announced to the assembly's committee on social questions by N. Baker, member of parliament. The British recommendation is that the League Council invite the governments of countries in which narcotics are manufactured to confer together as to the possibility of reaching an agreement on the total amount of such drugs to be manufactured annually and as to the quota of each that these countries should manufacture. The new attitude adopted by Great Britain brings her into accord with the attitude of Canada, the United States and Italy. By the British resolution initiative in calling a conference of the States is placed in the League's Council.

SHOULD HOLD EXPORT GRAIN FOR BETTER PRICE

Ottawa.—Nothing should induce the Canadian farmer to move his grain overseas unless he receives a proper price. This is the position taken by H. B. Ramsay, chairman of the Board of Grain Commissioners.

"There are sufficient storage facilities in Canada," Mr. Ramsay said in an interview here, "to take care of this year's crop as well as the large hold-over from last year. If there should be any question it will likely be only temporary."

"The welfare of all Canada depends on the farmer receiving a proper price for his grain," Mr. Ramsay said. "There has been some reluctance overseas to pay the figure demanded, but this should not discourage the farmer. He has a right to obtain an equitable return for his crop."

There was every indication that although this year's crop is not so large, it would be one of the best on record from a grading standpoint. The bulk of the crop is grading No. 1 and No. 2. Mr. Ramsay continued. "There is so little of the lower grades that the chief inspector has been unable to grade 4, 5 and 6 to make up composite samples for grading purposes."

WORLD HAPPENINGS BRIEFLY TOLD

New Zealand will appoint a trade representative in Canada. It has been announced. Growing commerce between the two countries is given as the reason.

The monoplane Bremen, first to cross the North Atlantic from east to west, is to be placed on permanent exhibition at the Museum of Peaceful Arts in New York.

A young peach tree bearing a fruit, half of which was a peach, and the other half a nectarine, was exhibited at the recent show of the Royal Horticultural Society in London, England.

Exports of Canadian wheat during the month of August totalled 10,156,266 bushels with a valuation of \$1,397,483, according to returns compiled by the Dominion Bureau of Statistics.

The D-100, British dirigible now under construction at Cardington, England, which was planned to make a trans-Atlantic flight to Montreal this fall, will not do so until next May, according to officials of the Department of National Defence.

Hon. Dr. Robert George Brett, pioneer medical practitioner in Alberta and one of the most outstanding public men in the province, died recently in Calgary, at the age of 78, after a illness extending over several weeks.

Lord Ypres, son of the late Field Marshal, plans to leave for the United States shortly to exhibit his paintings. Lord Ypres plans to exhibit in a studio built in the gardens of his home, Ypres House, built during the reign of William III.

Premier Mackenzie King proposes to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west.

French Bakers Celebrate

Commemorated Four Hundredth Birthday Of the Doughnut

This generation has an evident fondness for anniversaries. People like them, and seek causes for holding them. Therefore, no person can object when French bakers decide to commemorate the fourth birthday of the doughnut.

The first example of the famous confection was made in Paris in 1529. Some time later it got passed over the Channel into England, and from there made its way with household effects and other ideas to this continent.

The first doughnut, we read in the Christian Science Monitor, was shaped like a crescent. That is, of course, interesting, but is of comparatively little importance. The real thrill will come with the name of the genius who first took a hoe and molded the doughnut round the vastest grain.

Promoting Trade Welfare

Six Apprentice Grocers From Great Britain Now Touring Canada

So that they may know better the Canadian goods they will hand over the counters in their shops in England, and to promote the welfare of trade between the two countries and the Dominion, six apprentice grocers from Great Britain are now touring Canada, under the auspices of the Department of Trade and Commerce, with the co-operation of the Canadian National Railways. They were selected for the tour by an essay competition conducted by the British Institute of General Grocers for the Department of Trade and Commerce.

Cue To Unsolved Mystery

McMillan Expedition Finds Traces Of Frobiisher Party, Lost In 1576

A clue to an unsolved mystery of nearly 400 years' standing—the disappearance of five men left on Kullarnian Island by Sir Martin Frobiisher in 1576—is reported by Donald B. MacMillan, on his return here from over two months' exploration voyage to Baffin Land.

On an island on Countess Warwick Sound, the famous explorer discovered an ancient stone house which the Eskimos said was the work of white men. Inside were the bones of a bear and other evidence that it had been used as a shelter. The age of the moses and other particulars pointed to the dwelling being contemporary with Frobiisher.

Kullarnian was also visited and there the party found, in a very fair state of preservation, the house built by Frobiisher in Queen Elizabeth's day. Digging in the earth floor, they discovered some pottery and other relics belonging to that period; also traces of the ship-wreck which the intrepid explorers launched the boats they built after their ships were crushed in by ice. It was hitherto supposed that the five men left behind by Frobiisher of one of his three voyages made attempts to build a fort to protect the supposed gold mines and had been killed by Eskimos. Careful enquiry among the natives revealed a tradition that the white men were not slain, but built a big boat and set out on their perilous route to England.

The relics now found by MacMillan indicate that they had proceeded only about fifty miles when their frail craft was crushed by icebergs, and "one or more escaped ashore and built the shelter in Countess Warwick Sound.

The Singing Fool

By HUBERT DAIL
Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, a singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. Grace, the cigarette girl at Blackie's, who loves Al without his knowing it, is left behind. He marries Molly Winton, a ballad singer, and makes her famous, too. She does not love him. Molly has a baby, Junior, whom Al adores. Al becomes part owner of the fashionable Club Bombo, and on the night of the third anniversary of his marriage presents his beloved Molly with a diamond brooch. He does not tell her, Molly, while approaching the club in her limousine, was suddenly kissed by his friend, Sam Terry, who begged her to leave Al. On the way home with Al she is badly shaken when she sees Al later in the nursery bending devotedly over sleeping Junior, his baby son, her conscience bothers her. This, in turn, makes her angry at her husband.

CHAPTER XIV.

Al heard Molly's step and turned to embrace her. She deftly avoided his grasp, stalling the look of aversion in her eyes as she did so. Al thought nothing of it; he believed she was merely anxious to avoid any noise that might wake Junior. Again he made a move as if to touch the child, but Molly caught his hand.

"Oh," she murmured in an irritated voice. "Don't wake him, I'm tired. He might cry."

Al pretended in earnest pantomime that he had no intention of waking Junior, but, unseen by Molly, his other hand crept toward the protruding chin of the boy. Terry was Al couldn't bear the thought of going to bed without a word or two with little Junior. So as Molly turned away to go to her own room, Al nudged the baby's foot and smiled to himself. Junior's eyes opened sleepily and as he recognized his father, he murmured, "Hello, daddy."

At the gentle words Molly turned, a smile stealing over her face in spite of herself. There stood Al, pretending surprise that Junior had awakened, but obviously delighted that he had happened so quickly. He leaned over, gathered the baby in his arms and straightened up with the child held close to him. One chubby, soft arm went round his neck.

"Good boy, daddy," whispered Junior, snuggling closer. "Come home."

Swiftly Al carried his precious bundle toward Molly, who waited, a look of indignation upon her face. She wanted to see Junior and cuddle him, too, yet the sight of his innocent baby face at this moment sharpened her guilty thoughts and aggravated her irritation toward Al. But Al was holding Junior toward her, so there was nothing to do but take the child in her arms.

"Be more careful," she whispered petulantly. "You're spoiling my curls!"

Al noticed her tone and quickly took Junior from her. But as soon as she had left the nursery and Junior sat down on his father's lap,

face; desperately she struggled to think of an explanation that would smooth things over. But it was no use—she had gone too far; there was no turning back.

"What is it, darling?" Al pleaded. "You tell me? Haven't you everything to make you happy in this beautiful home—a baby—me?"

But Molly seemed to grow harder with every word he uttered. Her icy silence, as she confronted him with gleaming eyes, sent a dreadful current of fear through him. There was nothing he could say to arouse her—to drive out this evil spirit and bring back the Molly he loved. He said with a controlled quietness that gave no hint of his madly throbbing heart:

"You act as though you don't love me—any more. Don't you?"

At that Molly's head came up. It was as if she had been waiting, trying to force him to a showdown. Now she was ready to speak.

"I don't love you any more."

The dreadful words were spoken slowly and soberly, but the minute they were out of a mouth consisting of her lips and her eyes flashed defiance. Now—at last—she had come clean. Now, her attitude said what was he going to do about it?

Al recoiled as if he had struck him across the face with a whip. The words seemed to travel swiftly down interminable corridors in his brain, and came echoing back.

But finally Molly could stand the silence no longer.

"You heard me!" she exclaimed harshly. "I meant it. I don't love you! Do you understand? I don't love you! Now let me alone!"

The last remark was shot at him with deadly intent. Once there, it might have thrown a burning, flaming faggot. It was all over now, she thought; there would be no more pretense, no more parting of the ways. The climax of the storm that had been gathering force within her for more than a year. She didn't love him; in fact, she hated him. It was a terrible intuition because he had made her feel unworthy by loving her too much.

Al did not cringe as he listened to her, yet he knew at last that their life and comradeship together were utterly and forever ended. She was dead, but as they faced each other, eyes agleam, hands clinched, another sound like the faint wisp of smoke of a bell. It was Junior's voice, calling gently:

"Mamma! Please come to me."

(To Be Continued.)

WHEN BABY IS WELL MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing, chirping baby who always brings joy to the house. When baby is ill everything in the home suffers. Baby is only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Keck, Lindbergh baby, says: "I know that mothers and she writes as follows: 'I am the happy mother of a seventeen-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and without the Tablets in the house.'"

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels; sweeten the stomach and thus drive out constipation and indigestion and make the cutting or teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Car Accidents in Iceland

Increasing Number of Automobile Accidents Presents a Problem Iceland, of all places under the sun, is complaining of its growing number of automobile accidents. Just like Chicago and New York and London, this metropolis has its careless drivers and its drunken drivers. And all of this, of course, means more accidents.

An auto bus took a turn in a country road too rapidly. Two passengers were killed and the others injured. Icelandic authorities hailed the driver into court, found that he conducted his bus in a most careless manner and sentenced him to a month in jail. His license was taken away permanently.

Kill that corn with Mearl's Liniment.

"Ain't you going to get up and fight I told you you've got him going."

"That's all right, you tell me when he's gone."

"Electric Man" Puzzles Doctors

Receives Shock When Using Telephone or Radio Headphones

Frederick Stone, a chauffeur at Halloworth, north Devonshire, England, is so charged with electricity that:

- (1) He cannot use a telephone or wear a radio headphones without receiving a shock, and
- (2) He cannot drive his automobile or walk without wearing vulcanite insulation pads in his shoes, and
- (3) He can locate buried gold, silver and copper in his shoes.

This strange "electrical" man has spent 20 of his 49 years in hospitals puzzling doctors.

A phone test of his driving powers has been held at Plymouth Municipal Museum under the supervision of a local electric man located without trouble buried nuggets of gold, gold-bearing quartz and even gold jewelry.

Stone finds hidden gold and copper by means of a wand consisting of an ordinary steel clock spring. This wand is held in his hand like a snake when he approaches buried treasure. The number of wriggles denoted the number of feet he is away from the exact spot.

Discussing his unusual gift, Stone said that these diving spells put a great strain upon him and were always followed by periods of intense lassitude.

"The only way I can get relief from the electric currents which I am thus overcome," he said, "is to touch wood."

"I enjoy listening to the wireless with headphones, but as soon as I put on a pair of headphones I feel physical helplessness as if I had received a shock. I have tried to use a telephone without intolerable discomfort."

"I once wore my wife's wristwatch and it came all to pieces as I was supercharged with electricity."

Little Helps For This Week

"Watch therefore, for ye know not what hour your Lord doth come."—Matthew xxiv. 42.

Think not I dread to see my spirit through the dark days of full moon. Death has no terrors when the life is true.

"It is living ill that makes us fear to die."

—Omar Khayyam.

When the hour of death comes, when the soul to high and low alike, then it's no what we have done for ourselves, but what we have done for others that we think on most keenly.

—Sir Walter Scott.

When a man dies, they who survive him ask what property he has left behind. The angel who bends over the dying man asks what good deeds he has sent before him.

—The Koran.

Pity the Editor

A Difficult Matter To Be Popular With Everyone

It is likely editors are the most unpopular people in the world. If they try to please one group, they offend another. If they express honest convictions, which they usually do—narrow critics to the contrary notwithstanding—they are by many misjudged and discredited.

If perchance, at rare intervals, an editor hears of no error that has crept in or feels no assault on his idea of what should or should not be published, he is profoundly relieved—almost happy. He does not need commendation for any meritorious thing he has written or done to make him measurably satisfied with life.

All he needs is freedom from the sharp criticisms or grouches looking for imperfections or grounds for disagreement. There is no closed season, and often he is lambasted without knowing it, but if he doesn't know it, he is not hurt, and he may even imagine he has escaped by unanimous consent.

We would counsel the young who contemplate journalistic careers to develop thick and tough hides as a preliminary step, and leave behind all desire to run for office, or to win in any other form of popularity contest—Benson, Minn., Monitor.

The Professor—After your motion for a new trial has been denied what is the next step to take?

The Pretty Girl Student—T4 cry a little.

You can take lessons by mail to increase your will power or you can practice getting up at night for another blanket.

Idea May Be Feasible

Berlin To New York In Six Hours Is Plan of Young Engineer

"Take a solid breakfast in Berlin and don't worry about food on the plane. You can have lunch in New York."

This might be the last advice given by good friends to a passenger of a futuristic airplane not yet constructed, but planned by Heinz Guesner Perle, a 21-year-old Berlin engineer. Perle claims that his plane would make the trip from Berlin to New York in about six hours, saying that world-famous scientists and experts like Professor Einstein and Count Arco studied and enthusiastically approved of it and now firmly believe in its feasibility.

"Table scraps can be converted into many useful things," advises a writer. For instance, if the scrap ends in tears, the little woman can convert it into a spring hat.

Bulwark Of Civilization

Sir Robt. Borden Says British Commonwealth Of Nations Is a Model

The British Commonwealth of Nations stands today as a model to the League of Nations. To destroy its unity would be a crime against mankind. So stated Sir Robert Borden, Canada's war-time prime minister, at a luncheon of the Canadian Club at Ottawa. Sir Robert was speaking on the occasion of the entertainment by the Canadian Club of the National Federation of Canadian University Students and other delegates to the second imperial conference of students, in session at Montreal. He chose for his subject, "A Vista in Political Evolution."

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach services have been over-stimulated, and food sour. The corrective is an alkali, which the alkalies make instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has been the standard with physicians for 50 years since its invention. One spoonful of this harmless,

instantaneous alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude cathartics when you know the efficacy of Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid in the stomach. It contains full directions—any drugstore.

OLDS SCHOOL OF AGRICULTURE DEVELOPING MECHANICS BRANCH OF ITS COURSE

The School of Agriculture at Olds will open for the 16th session on October 29th next. The number of applications and enquiries that are being received indicate that there will be a good average attendance again this year. The average attendance for the past three years has been 251, and it is expected that the attendance this year will be very close to that figure.

The courses that are offered are very similar to those that have been taught in the past. The mechanics branch, however, is being strengthened. The school is taking on a special instructor in gas engines and farm machinery. The services of this man will be for the purpose of strengthening the mechanics instruction in the mechanics branch of the agricultural course. With the services of an additional instructor who is especially well qualified for giving instruction in electricity, gas engines and farm machinery, it will enable the school to put on a course that would rank among the highest in the province in these subjects.

The dormitories are capable of accommodating approximately 175 for board and room. Those who apply early and book their reservations for rooms get the preference at the time of registration; however, those who are not able to get into the dormitories, have their accommodation arranged for by the school management, with good homes in the town of Olds. The cost of board and room in the school and in private homes is \$1.00 per day per student.

Alberta Wheat Acreage Placed at 7,422,962

Threshing is fairly general throughout the province, and grain in many cases is yielding higher than was anticipated. Threshing has been resumed in most districts after a short period of unsettled weather which delayed operations to some extent, and with continued good weather will be completed somewhat earlier than was the case last year.

From the reports received it is estimated by the department that the average wheat yield for the province will be between eleven and twelve bushels per acre. This is as close as the estimate can be made with any degree of accuracy until further returns are received from the threshers throughout the province. The above figures are borne out by the returns which have already come in.

According to an estimate arrived at jointly by the department of agriculture and the Dominion bureau of statistics, the wheat acreage in Alberta this year has been placed at 7,422,962 acres.

A very satisfactory feature of the present season's yield is the high quality of the majority of the wheat being threshed, many districts reporting a large percentage of No. 1 and No. 2. In some cases, however, the grade has been reduced by the presence of green kernels, but in very few cases is the grade below No. 3.

It is apparent from the reports that there will be a shortage of seed oats available for next year's crop. In some districts in the central parts of the province, but it is believed this demand can be met satisfactorily by other sections of the province where a heavier yield of the coarse grains is being threshed.

Negotiations have been under way between the Alberta government and the railway companies respecting the free shipment of hay and feed oats into those districts where the crop is short. These arrangements have now been completed and the plan will be in operation after September 18. Farmers interested in taking advantage of this arrangement are asked to communicate with the department of agriculture where full information is available.

A careful survey made by the field representatives of the department indicates that a comparatively small amount of hay will be required as every available source has been made use of and the dry weather has permitted the cutting of hay on many sloughs which were previously flooded. The amount required will, of course, depend on the length and severity of the winter. There has been quite a demand for feed oats in the area most severely affected by the drought.

Safety Deposit Boxes

\$3.00 and Upwards
